

Best Practice Guide – Guided Teaching and Learning Reviews

When agreeing your Teaching and Learning session, ensure you complete the 'instruction panel' in the LPC in Aptem.

This is where you advise the learner of work to be completed prior to/activity to prepare for the session, what will take place and the intended outcome.

This is the learner's lesson plan and encourages engagement and session progression.

Remember the T&L review is only visible to the learner once it is fully completed.

The below Teaching and Learning Best Practice guidance gives you tips on what to include in each section of the Teaching and Learning review and resources that can support you. This Best Practice guidance is to support you if you have used the 'Guided Teaching Session Plans.'

	Guidance
What are the learning objectives for this session?	• Provide a rationale, why are you teaching this topic? • It is important that you understand the learner's starting point by reviewing the skills radar and discussing previous knowledge and experience around the subject. • Include the aim (session intent) followed by objectives (the steps needed to achieve the aim), found in the 'Guided Teaching Session Plan.' These will be adapted based on your learner's starting point and the areas they need further teaching. • Identify and record the desired outcome by aligning to KSBs and EPA methods of the Standard. Recap on existing learning and build in new learning. KSBs can be found within the 'Guided Teaching Session Plan.' • Think about how you are going to sequence the session. Ordering of the content to improve the learners understanding to help achieve the objectives. The 'Guided Teaching Session Plan' guides you through this sequencing. • Consider how to stretch and challenge.

	<i>Example – In relation to the skills radar scores where you scored 2 for leadership theories, the purpose of the session will be to develop knowledge in the following areas;</i> • Summarise key features of leadership theories and explain how they apply to current Early Years practice, using contextualised examples. • Demonstrate understanding of Leaderful Practice and its core principles, including shared leadership, collaboration, and reflective practice. • Apply leadership theories to real-life scenarios in Early Years setting, justifying the choice of leadership style/theory used. • Evaluate your own use of Leaderful Practice within your current setting. • Analyse the impact of shared and distributed leadership on, team dynamics and morale, children's learning and development and opportunities for continuous professional development
How will these objectives be met?	• What are you planning to do to meet the aims and objectives of the session? • How are you going to do it? • What resources are you going to use? The 'Guided Teaching Session Plan,' gives you activities to cover with your learner. Their starting point will determine which activities they need to complete in order to develop their knowledge. Refer to the 'Guided Teaching Session Plan,' in your planning and the activities you will be covering. Remember you will need to adapt this to meet the individual needs of your learner. Individualise your plan: • Activate prior knowledge, provide context, link to role and organisation • ALS – Refer to the individualised ALS plan in the learner's documents to make relevant adjustments to meet the learner's needs. Consider the activities in the plan and how you might adapt them to meet your learner's needs. • Consider all learning styles and preferences. • Consider access to technology and how you will embed digital skills. <i>Example-</i> <i>The knowledge will be delivered using activities 1 and 3 within the 'EYLP Level 5 Session Plan Module 1.' There will be an activity to research Transformational Leadership Theory, Transactional Leadership Theory and the Contingency Theory summarising the key points of each. You will then apply the theories in practice through a series of scenarios. We will take regular breaks throughout the session, these will be for 5 minutes every 15 minutes, as you have recognised this is how long you can concentrate for and your eyes tire when using the screen. You will make notes to refer back to following the session, as you find these helpful for remembering key information.</i>

How does this link in with the learning plan?	What module/KSB/qualification criteria is needed to be covered, ensure the learner understands how the learning is progressing them through the apprenticeship/qualification. KSBs can be found in the 'Guided Teaching Session Plan.' <i>Example –</i> <i>This session links to the Leadership in Early Years Module, LPC Approaches and Practice. Knowledge and skills showcased during the session will link to criteria K18, S17 and S22 of the observation and questioning.</i>
How will learning be checked? (Role Play, Question & Answer, Professional Discussion etc.)	'Guided Teaching Session Plan,' have assessment built in to support checking starting points and formative assessment following teaching. These can be adapted to support your learners and their individual requirements, where you might consider assessment methods such as gamification (Kahoot), and utilising MS Teams tools like polls and annotation to gather how well the teaching has landed and to help boost engagement. Think about assessment methods, do they align to EPA guidance for methods available on Huddle.
Detail how the learning in this session links to the wider curriculum (Life Skills, English, Maths)	'Guided Teaching Session Plan,' naturally embed the wider curriculum into the session. TIP: Be mindful once you identify your learner's starting point, you might not complete all activities where wider skills have been embedded. You will need to consider how you might offer more opportunity to embed. - Rotate topics over the course of the teaching sessions, alongside LifeSkills in Aptem. TIP: Review the LifeSkills delivery plan to help embed relevant activity. TIP: Refer to the learners FS diagnostic result to incorporate development areas, such as embedding reading or writing skills. - Use 'Thrive' and other timely events from the cultural calendar. - The session needs to flow so only apply if they add value. i.e. Not all wider skills will be suitable for all sessions.

	<i>Example- Leadership Theories are aligned to keeping British Values and English, they will be considering the BV that Leadership Theories can support and how, as well as researching information and presenting key concepts back, showing comprehension, critical thinking and writing skills. Digital literacy will be showcased through researching information using reputable sites.</i>
Please discuss with your learner what they have learnt in this session and how they will use this new knowledge/skill in their workplace and record their comments here.	• Insert an impact statement from the learner and add your summary, the skills radar should be updated and new goals set. TIP: Capture learner's feedback via team chat recording to save some admin time. TIP: Use reflective questioning to support learners create their comments, such as, 'How confident do you feel about applying what you have learnt today?' 'Give me an example of a situation where you could apply what you learned today?' <i>Example- I am now more aware of the Transactional and Transformational leadership theories, as well as where I have previously used them in practice and the impact of this on developing my team. I now understand where you might use different leadership styles in practice and why adapting this for your staff is important, as well as how leaderful practice benefits them. I am going to create a journal where I can capture over the next month opportunities for leading and which practice I adopted and why. After reviewing my skill radar with my Coach, I have moved from a 2 to a 6.</i>

Internal Use Only

Please record any actions needed to help support the learner moving forward, and what they need to do next	• Record feedback to the learner on what they did well and areas to develop, linking this into next steps for the learner. This contextualises the actions set. <i>Example - During today's session you confidently described the Transactional and Transformational theories, as well as their application in your workplace demonstrating strong knowledge in this area, however, you needed support when looking at how to adopt leaderful practice, this will take some time to embed.</i> • Follow with the action, such as revisit the learning in Aptem in LPC (Insert title). <i>Example – Refer back to your notes from today on Contingency Theory, you can also find this in the Early Years Module, LPC Approaches and Practice.</i> • Add in the estimated time to complete and target date for submission.
---	--

	- The Learner should be tasked to implement the new learning back in the workplace to further develop their KSB's and support their retention of the subject taught. TIP: Following the teaching on Leadership Theories, you could set next steps of shadowing a manager identifying which leadership theory they have adopted in practice and the impact on the team member. Would you use a different theory and why? <i>Example - Please shadow your manager, observing how they use leadership theories in practice, consider the impact of these and where you might adopt a different leadership style and why. Remember to record this within the OTJ log and upload to Aptem for feedback.</i> TIP: 'Guided Teaching Session Plans,' over off the job and some stretch and challenge activities for your learner to undertake post session. These build on or help embed what has been delivered through the session. You will also find some suggested examples for EPA where learners have portfolio of evidence to create. - Next teaching and learning session to be planned, coordinate dates/times and locations. Refer to the next 'Guided Teaching Session Plan,' this will support identifying plans in conjunction with the skills radar. - Subject webinars and skills days should be discussed if applicable to the apprenticeship. - SMART targets outlined before next planned interaction. - Stretch and challenge – Arrange any post work and signpost to additional resources if learner does not need to revisit learning. TIP: Planning completed here can be carried across to the 'instruction panel' in the next T&L session to complete the cycle.
Attachments	It is good practice to add the session recording here and any work created during the session. This will benefit the learner during their revision or can be signposted back to, should the learner need them post practice assessment.
Delivery Method	Use the drop down to select remote (virtual learning) or face to face
